The image shows a Gantt chart interface on a computer screen. The chart is organized into horizontal lanes, each representing a task. The tasks are color-coded: yellow for primary tasks, grey for sub-tasks, and white for specific activities. The timeline at the top ranges from 10:00 to 22:00 in one-hour increments. A hand is visible on the left side of the screen, pointing at the chart. The chart shows a complex schedule with many overlapping tasks and sub-tasks, indicating a detailed project plan.
